Top Down

Colonial

Window Opening Control Device (WOCD)

Factory-installed Window Opening Control Devices (WOCD) from JELD-WEN are designed to meet the ASTM F2090-10 standard intended to prevent accidental falls from windows by children five years of age and younger. See your JELD-WEN dealer for more information.

Even Sight Lines

Machined Delrin™ Rollers

Glide smoothly on a raised metal monorail track

MAG-Lock®

MAG-Lock automatically locks the window, and with the use of magnets it only activates when the window is in the closed position – creating an audible click. The integrated, ergonomic pull handle makes it easy to unlock and open the window in one movement. For added security, the lock indicator is only viewable from inside the home.

ENERGY SAVING & PERFORMANCE GLASS

Energy Saver®—REDUCE HEAT LOSS UP TO 30%

Offering the most cost-efficient energy upgrade, the Energy Saver package includes upgrades from clear to Low-E glass and argon gas for improved thermal performance. Energy Saver reduces heat loss by 30% compared to clear insulating glass.

Energy Saver® Plus—REDUCE HEAT LOSS UP TO 40%

The best value in insulating glass, Energy Saver Plus includes argon gas for improved thermal performance and LoE³-366 glass. With triple layers of Low-E coating, LoE³-366 helps you save energy through improved thermal performance, reduces solar heat gain and helps protect interior furnishing from fading.

Energy Saver Plus reduces heat loss by 40% compared to clear insulating glass.

Energy Saver® Max—REDUCE HEAT LOSS UP TO 50%

For maximum energy protection, select Energy Saver Max. This insulating glass package contains three panes of glass, both with argon filled chambers and Super Spacer.

Coated with Low-E or optional triple-coated LoE³-366, you can rest comfortably even in the harshest weather. Energy Saver Max reduces heat loss by 50% compared to clear insulating glass.

Energy Saver® Max-K—REDUCE HEAT LOSS BY MORE THAN 50%

Energy Saver Max-K qualifies as a an R-5 window under the federal energy efficient window initiative. This package includes all of the benefits of Energy Saver Max, and adds a Krypton gas fill along with argon gas for the most advanced thermal insulation available from JELD-WEN. Energy Saver Max-K reduces heat loss by more than 50% compared to clear insulating glass.

Tempered Glass

When glass is heat-treated during manufacturing, it is provided with extra strength, enabling it to withstand abnormal force or pressure on its surface—it will not break into sharp pieces. Local codes often require tempered glass to be used in all windows that are close to the floor or near doors, bathtubs or showers.

Laminated Glass

Laminated glass consists of panes of glass with an invisible interlayer, sandwiched together to create an extremely sturdy glass unit. This provides increased protection for home safety and from incidental impact; it also provides an improved barrier against sound and harmful UV rays.

Neat® Glass

With this glass option you gain natural cleaning convenience. By harnessing the sun's UV rays (even when the sky is cloudy) to loosen dirt from the glass, rainwater can easily rinse away grime. No manual activation is required.

SoundMaster

SoundMaster glass uses different glass thickness and more dense weatherstripping to improve sound blocking performance, making Premium Vinyl windows quieter. SoundMaster glass reduces sound transference by 40% compared to standard window glass.
