AuraLast® Wood protects against wood rot for as long as you own and occupy your home. Guaranteed.

Guaranteed Protection Against Wood Rot

JELD-WEN Wood Windows and Patio

Doors made with exclusive AuraLast Wood are guaranteed not to rot for as long as you own and occupy your home. Wood components made from AuraLast Wood maintain their structural integrity even in the toughest climates. Find warranty highlights on the back cover for more information.

Surface To Core Protection

Because of our vacuum/pressure process, AuraLast Wood provides virtually 100% penetration of the protective ingredients. Other manufacturers use submersion/dip-treatment methods, which only protect the outer surface of the wood.

Working With AuraLast Wood is Easy

AuraLast offers the strength and beauty of real wood because it is real wood, not a composite. AuraLast Wood is colorless, stainable and odorless.

AuraLast is Safe

AuraLast Wood is made by using a water-based solution to deliver the effective ingredients to the core of the wood. Traditional dip-treatments use a solvent-based chemical bath. During production our AuraLast process releases 96% fewer volatile organic compounds than the traditional dip-treatment method.

Traditional treatments only protect the outer surface

Virtually 100% Surface to Core Protection

A JELD-WEN Exclusive

Only JELD-WEN makes window and door products with natural pine AuraLast Wood.

Protects Against Water Saturation

AuraLast Wood offers superior resistance to water saturation, which protects against swelling that causes windows and doors to stick.

Protects Against Termites

Harmful termites will eat through unprotected wood—not so with AuraLast Wood.

GLASS OPTIONS

Low-E and LoE³-366 and Insulating Glass

High-performance Low-E insulating glass comes standard and helps lower energy costs, allows homes to stay cooler in the summer and warmer in the winter, prevents fading of interior furnishings, and reduces condensation. It also delivers greater visible light transmittance than tinted glass. We also offer optional LoE³-366, which provides even more protection against heat loss and fading, as well as greater energy savings.

Most windows and patio doors with Low-E glass are ENERGY STAR[®] qualified. ENERGY STAR products help Americans save energy, save money and reduce their carbon footprints. ENERGY STAR criteria for windows are based on the U-factor and Solar Heat Gain Coefficient (SHGC) combinations that provide significant energy efficiency for a given climate zone. It's easy! Just tell your JELD-WEN dealer you want JELD-WEN windows that are ENERGY STAR qualified for your climate zone. For more information, visit www.jeld-wen.com/energyefficiency.

ENERGY STAR[®]

Many JELD-WEN windows and doors are ENERGY STAR qualified. Homeowners can save energy—and money—by replacing old windows with ENERGY STAR qualified windows and pay a 7-15 percent lower household energy bill. Lower energy consumption also reduces greenhouse gas emissions from power plants and shrinks a house's carbon footprint. JELD-WEN has been an ENERGY STAR partner since 1998.

TEXTURED/TINTED GLASS & SCREENS

Phantom Screens® Technology

Fully retractable for a clear view

Integrated design creates a seamless look

This feature includes retractable insect screens that fully reveals the exterior view. These screens are designed to keep more insects outside, while letting more natural light inside. They feature fine, black fiberglass mesh with a light gloss finish. BetterVue™ insect screens are now standard for awning, casement, double-hung and sliding windows.

Screen Options*

View through regular fiberglass insect screen

View through BetterVue™ insect screen (standard)

View through optional UltraVue™ insect screen

Insect screens are intended to allow air and light in, while keeping insects out.

They are not intended to stop children from falling through an open door or window.

For safety screens and other security devices, contact your local building supply retailer.

*Please note: These images are for illustration purposes only. Actual screen may appear different.
