

VIRTUALLY 100% SURFACE TO CORE PROTECTION

AuraLast® Wood—Clearly The Survivor!

AuraLast Wood was put to the test for several years in a very harsh and humid environment. This test hut was built directly on top of a termite colony.

After removing the window from its unprotected framework, the AuraLast Wood clearly withstood the harsh elements of wood rot and termite attack.

The JELD-WEN website is your ultimate resource for learning about our windows and doors. It has all the product information and design advice you need. Visit us at jeld-wen.com today.

AuraLast® - The Wood That Does Not Rot

Product Overview

Wood Windows | Exterior Frames
& Components

Official window and door provider of Major League Soccer

AuraLast® Wood protects against wood rot for as long as you own and occupy your home. Guaranteed.

Guaranteed Protection Against Wood Rot

JELD-WEN Wood Windows and Patio

Doors made with exclusive AuraLast Wood are guaranteed not to rot for as long as you own and occupy your home. Wood components made from AuraLast Wood maintain their structural integrity even in the toughest climates.

A JELD-WEN Exclusive

Only JELD-WEN makes window and door products with natural pine AuraLast Wood.

Surface to Core Protection

Because of our vacuum/pressure process, AuraLast Wood provides virtually 100% penetration of the protective ingredients. Other manufacturers use submersion/dip-treatment methods, which only protect the outer surface of the wood.

Protects Against Termites

Harmful termites will eat through unprotected wood—not so with AuraLast Wood.

Protects Against Water Saturation

AuraLast Wood offers superior resistance to water saturation, which protects against swelling that causes windows and doors to stick.

Working with AuraLast Wood is Easy

AuraLast offers the strength and beauty of real wood because it is real wood, not a composite. AuraLast Wood is colorless, stainable and odorless.

We Care

- » 96% fewer volatile organic compounds (VOCs) released during the manufacturing process than traditional wood submersion dip-treatment methods
- » Water-based solution safe to handle compared to much harsher, solvent based treatments
- » Longer lasting products mean less waste and more efficient use of our natural resources

WHAT IS AURALAST WOOD?

AuraLast Wood is the result of years of research and development, producing an exceptional pine wood that lasts and lasts for many years to come.

Traditional treatments only protect the outer surface

The proprietary vacuum-pressure process with leading technology is designed to distribute the active ingredients into the core of the wood for virtually 100% surface-to-core protection against wood rot, termites and water saturation.

The carrier for the active ingredients in AuraLast is a water-based solution; selected because it does NOT harm the environment with hazardous VOCs found in most other traditional wood preservation methods.

BEAUTIFULLY THE BEST

- » **COLORLESS:** The protective water-based solution process does not alter the color of the wood's natural beauty.
- » **ODORLESS:** The protective water-based solution process does not create offensive odors unlike harsh solvent-based treatment methods.
- » **STAIN:** AuraLast Wood door and window frames can be stained to match any wood tone/color application and no pre-sealers are needed.
- » **NATURAL:** AuraLast Wood products are made with all natural wood and are much easier to work with compared to other composite or PVC materials.
