Corner Key Construction

Our Builders Aluminum windows include a unique performance feature. It's our patented silicone-injected corner key, which is created by injecting silicone into the corners for added strength. This feature also ensures the window is reliably weathertight.

Silicone shown in black here. Actual windows will have silicone that matches frame color.

Frame Options

Flange Frame

Pocket/Block

Designed to be installed directly into the pocket-like space left after an old sash is removed.

Frame Colors*

White

Bronze MB40

*Actual colors may vary from the samples displayed.

Glass Options

Low-E Insulating Glass

Our standard high-performance Low-E insulating glass lowers energy costs, helps homes stay cooler in the summer and warmer in the winter, prevents fading of interior furnishings, and reduces condensation. It also delivers greater visible light transmittance than tinted glass.

Many windows and patio doors with Low-E glass are ENERGY STAR® qualified, which means they exceed the minimum energy efficiency criteria for the climate region you live in (by as much as 40 percent).

In warm weather, Low-E glass reflects the sun's energy and prevents it from entering the home.

In cold weather, Low-E glass reduces the amount of heat lost by reflecting it back inside.
