

**KEY SELLING POINTS**

**High Performance**

- » Solid pine AuraLast® Wood with Lifetime Limited Warranty
- » High efficiency fiberglass sill system
- » Standard PG 35 rating; optional PG 50 rating\*
- » New double weather-strip design
- » Silicone injected corner key frame construction
- » Standard vertical & horizontal adjustable hinges
- » ENERGY STAR® certified with standard Low-E<sup>3</sup>-366 and Neat® glass with argon gas fill

**Security**

- » New 3-point concealed lock system with baby-sitter feature; allows the dead bolt and extension bolts to operate independently of each other for ease of operation
- » Shoot and dead bolts meet the highest levels of structural testing and comply with most local building codes
- » Anti-Slam device prevents potential damage to door frame
- » High performance door panel construction including 8-1/4" or 10" bottom rail options

**Configurations**

- » Over 300 configuration options
- » Stationary sidelites with removable sash
- » Venting sidelites with 3-point locking system
- » Transoms – square, rectangle, and radius
- » Inswing, Outswing
- » Center Swing Doors
- » French Doors

**Aesthetically Pleasing**

- » Contemporary design complements any architectural style
- » Narrow & Wide Stile Doors
- » Continuous Head & Sill
- » Muller Window Unit Options

**Premium Wood Swinging Patio Doors**

JELD-WEN® Premium Wood swinging patio doors are the latest innovation among a new generation of patio door systems. This new, contemporary design offers over 300 configurations, generates incredible performance ratings and accommodates many design preference.

The consolidation of our finest Tradition Plus® and Sitaline® EX brands delivers an unparalleled swinging patio door system that is an excellent choice for new construction or remodeling projects and coordinates nicely with all JELD-WEN window collections.

\*Only available in certain sizes and configurations.

## Reliability Features

### Factory Assembled

- Door is shipped directly from factory assembled allowing for ease of installation and less work on the job site

### AuraLast® Wood

- Protects against termites, wood rot, and water saturation
- Protected by a Lifetime Limited Warranty

### Extruded Aluminum Cladding

- Provides durability and low maintenance on the exterior finish

### Continuous Fiberglass Sill

- Acts as an exceptional thermal barrier. The fiberglass will not transfer the temperature differences from the interior and exterior allowing for better performance from the door
- Concealed anchoring (i.e., sill fasteners placed in an interior mounting flange) reduces the risk of water damage; consistent fastening helps keep the sill level and helps with the ease of operation

### Silicone Injected Top Frame Corner Key and Frame Corners

- Long-lasting high-performance silicone injected into the joint between the head and side jambs for overall reliable weather resistance
- Injected silicone fills all the potential gaps between the corner key, frame and cladding to reduce chance of water and air leaks

### Ball Check Weep System

- Additional water and air infiltration defense even in high winds

### Weather-Strip System

- Weather-strip system endures driving rain equivalent to 8 inches of rain per hour during 45 mph winds and withstands wind speeds up to 118 mph.
- The continuous weather-strip wraps around the top corner to eliminate air gaps and water infiltration between a joint in the weather-strip

### Advanced Panel Construction

- Interlocking 3-finger stile and rail joint features an increased adhesive surface area
- Standard stile width: 4-5/8" wide with optional 3-11/32" narrow; Bottom rail: available in 8-1/4" width or 10" width (ADA compliant); Top rail width: 4-5/8"

### Vertical & Horizontal Adjustable Hinge System

- New hinge door system allows vertical door adjustment for height and also horizontal adjustments to the left or right

## Premium Wood Swinging Patio Door

### Redesigned Sill, Frame & Weather-Strip System

#### Cut Away & Sill

#### Corner Construction
