The Decorate With Doors Team accurately measures and custom-fits new doors to their existing frames - Quick, Easy and Hassle-Free

RELIABILITY *for real life*®

Replacing Interior Doors Has Never Been Easier

JELD-WEN has developed an efficient and reliable system of measuring, manufacturing and installing custom-made interior doors.

Using a state-of-the-art measuring device, 3-D measurements of your existing door frames are taken and sent electronically to our manufacturing plants, where the doors are built to fit your opening perfectly. Then the doors are simply installed without being invasive to your home.

Just choose your doors and the options you want...and the rest will be done for you.

IT'S AS EASY AS 1, 2, 3

1 Select Your Doors & Accessories

Choose your doors and accessories: An In Home Consultant will walk you through our offering to help you make the best choice.

2 High-Tech Measurements

An In Home Consultant digitally measures each unique opening, and based on these measurements, your interior doors will be custom made.

3 Professional Installation

A professional team will install your beautiful new doors, hardware, trim and accessories for a Hassle-Free dramatic improvement to your home.

Door Digitizer

The Door Digitizer is a state-of-the-art measuring device which allows the capture of 3-D measurements for the contour of each door opening (inside the jamb) — to create a truly unique and custom made door.

3-D Pinpoint Accuracy

The typical interior passage door has 13 points to measure. This includes:

- » 9 points along the contour of the existing frame are measured.
- » 2-4 hinge points depending on height of door frame and 1-3 strikes depending on function of door.

Precision Manufacturing of Your Perfectly Fit Custom Door

These measurements are then sent electronically to our manufacturing plants, where the doors are custom made to perfectly fit the opening.

All preparation — routing, sanding and painting of the new door is done at the JELD-WEN plant, not in your home. Your door order is manufactured, precision trimmed and available with factory applied prepaint color or clear coat.

This insures the Quick, Easy and Hassle-Free installation of your beautiful and reliable custom made doors.

Taking 3-D measurements for the contour of each door opening.

CNC Router cuts the door's contours and mortises the hinges and bores

Routing, sanding and painting of the new door is done at the JELD-WEN plant

Factory finish can be applied in 9 standard colors or any custom color of your choice
